Please plan to join us on Friday, March 4th from 9:00am - 10:00am in Room 511 of the Allied Health Building at 100 Penn Street.

RAFT Lab

Welcome
Glad you're here!

PTRS welcomed the Research on Arm Function & Training (RAFT) Lab last week with a luncheon on Thursday, February 25th, 2016. RAFT Lab projects focus on upper extremity function and particularly reaching behavior. Members of the RAFT Lab include Susan Conroy, Michael Dimyan, Elsa Ermer, Jaime Lush, Jeremy Rietschel, Isabelle Shuggi, and George Wittenberg.

Continuing Education Opportunities

More Bang for the Buck: Enhancing Outcomes Through Impairment-Based Treatment

**Saturday March 5, 2016
8:00 - 4:00 PM**

Instructor: Michelle Green PT, DPT
CEU Credits: .6 CEUs Approved from the Maryland Board of PT Examiners.

Where: Allied Health Building: 100 Penn Street, Baltimore, MD 21201

Free for CIs with voucher credits*. Discounted pricing for Alumni.
*If you are a PTRS CI and do not know your voucher number please check your CORE ELMS profile or email ptrsclined@som.umaryland.edu

Impairment-Based Treatment offers rehab professionals a structured framework to produce maximally effective treatment interventions. Rehab professionals are increasingly having to do more within a shorter timeframe. We need to be more effective and precise in our assessment and treatment prescription. The ICF Model will be examined and the participants will learn to tease out impairments which limit function and how to develop treatment interventions to address these impairments. Participants will learn how to hypothesize, test hypothesis, and prioritize impairments to promote more effective treatment interventions. Selection of appropriate tests and measures is reviewed. Extensive afternoon lab section designed to introduce use of common household and clinic items in their design to add fun and interest to their programs. This is not specifically ortho- or neuro-focused, but instead uses a wide variety of case examples to highlight the problem solving process for any diagnosis with examples tailored to the needs of the facility.

NORMAL AND VARIANT ANATOMY OF THE UPPER EXTREMITY: CLINICAL APPLICATIONS?

**Wednesday March 23, 2016
5:30-10:00 PM**

Instructor: Vincent Conroy PT, DScPT
CEU Credits: .4 CEUs Approved by the Maryland Board of PT Examiners

Where: Allied Health Building: 100 Penn Street, Baltimore, MD 21201

Free for CIs with voucher credits*. Discounted pricing for Alumni. Space is limited to 25 participants.

*If you are a PTRS CI and do not know your voucher number please check your CORE ELMS profile or email ptrsclined@som.umaryland.edu

This course is designed to enhance the participants' understanding of anatomical rationale associated with clinical diagnoses of the upper limb. Participants will be provided with a detailed anatomical review, both normal and variant, of the upper extremity and adjacent anatomical regions that may have influence on diagnoses. This review will allow each individual to formulate objectives that can be pursued in the laboratory sessions.

IT TAKES A VILLAGE: MENTORSHIP FOR THE CLINICAL EDUCATOR

MAC Spring Workshop

April 8, 2016
Registration 1:30-2:00PM
Workshop 2-6PM

Registration: Coming Soon

Where: Allied Health Building: 100 Penn Street, Baltimore, MD 21201

Course Description:

In 2014, with the support of APTA, the Education Section, and FSBPT, the American Council of Academic Physical Therapy held a Clinical Education Summit where stakeholders shaped a shared vision of a "common culture of teaching and learning based in strong partnerships with shared responsibility..." This innovative program is designed to foster collaborative networks that will provide educational mentorship opportunities for novice and experienced clinical educators. Participants will receive an overview of best practices in mentorship in clinical and educational arenas, discuss various strategies for the provision and receipt of feedback among all clinical education stakeholders, and explore the paralleled opportunities for mentorship for the clinical educator. The program will be offered in a multi-modal format including presentations, interactive simulations, and opportunities for informal networking.
